

NOISE

QuietWrap™ 3005

Product Highlights

- Operating temperature up to +80°C (+176°F)
- Prevents exposure of wires
- Excellent noise suppression
- Easy to install
- Extremely lightweight

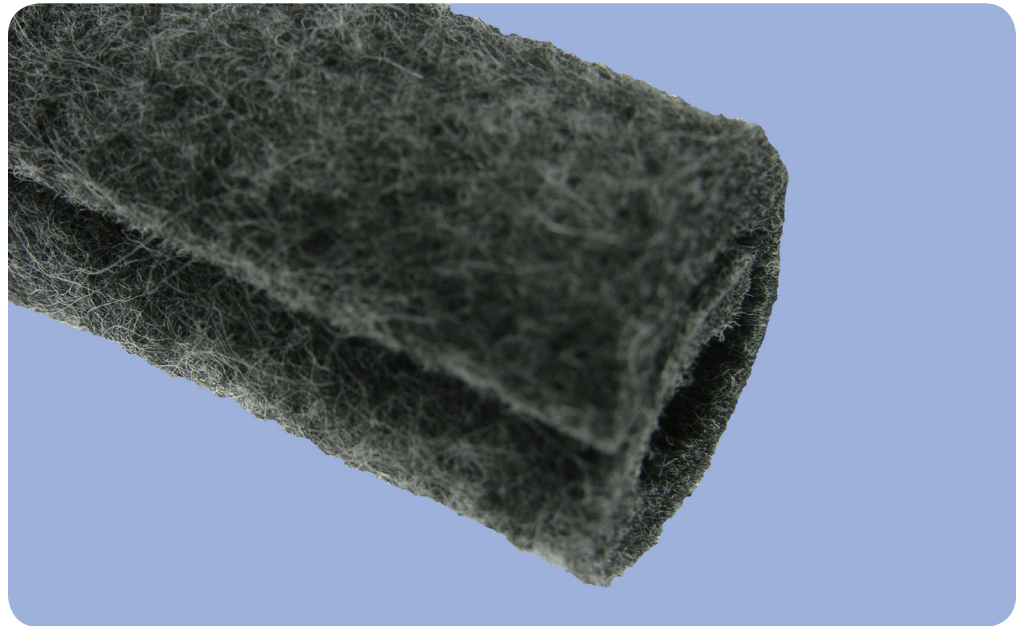

Typical Applications

- Door harnesses
- Instrument panel harnesses
- Seat harnesses
- Roof harnesses

Our manufacturing sites are certified ISO 9001, ISO/TS 16949, or AS/EN 9100, and ISO 14001

QW3005_07202017

QuietWrap™ 3005 is a self-wrapping protective sleeve designed to provide excellent noise suppression and abrasion resistance. Composed of a non-woven polyester, the product is lightweight and its thickness provides superior noise suppression performance for rattling/rubbing noise caused by vibrations.

QuietWrap 3005 has proper stiffness that facilitates harness insertion work into through holes. The product also has great weatherability, enabling it to be applied to areas in wetting risk such as door harnesses.

Its self-wrapping design allows for quick and easy bundling of wire and cable assemblies. The unique design easily allows for breakouts and can be installed over completed assemblies.

Performance Data – QuietWrap™ 3005

Property	Test Method	Result
Temperature Rating	240 hours at +105°C (+80°C rating)	Pass +80°C (+176°F)
Low Temperature Flexibility	BH100-016A	Pass -40°C (-40°F)
Fluid Resistance	BH100-003B	Pass
Limited Oxygen Index (LOI)	JIS K 7201	LOI > 22
Noise Suppression	SAE J2192	Rubbing: > 15dB Rattling: > 50dB

All numeric performance data shows average or typical values. Please consult your sales representative for product drawings, test reports and OEM approvals.

Construction and Typical Product Characteristics

Polyester (PET) non-woven
